The MVP-50 or EDM-930 allows pilots  
to accurately monitor dozens of engine  
and system parameters, program  
redline limits, setup custom inputs,  
create interactive checklists, store  
general flight information, build flight  
plans, record and review pertinent data  
from every flight, and so much more!

Details:

- ✓ MVP 50P display
- ✓ Complete harness and all  
required probes
