IDF540

FMS/GPS/NAV/COM
 ✓ Plug and Play w/ 530
 ✓ Hybrid Touch
 ✓ Easy Page & Tab
 ✓ GeoFill™
 ✓ Frequency Lookup
 ✓ Includes Jepp Approach

The IFD540 represents the next generation in FMS/GPS/NAV/COM systems. It provides VHF communication and SBAS/ LPV precision navigation and is designed to meet the accuracy and integrity requirements for ADS-B as part of the NextGen airspace initiative. As plug-and play replacement for legacy systems, the IFD540 shares the same basic functionality in large and compact display formats respectively.

When it comes to panel-mounted avionics, you now have a choice and the choice is easy. Avidyne.

AXP340

Mode S Transponder w/ ADSB Out

- ✓ Extended Squitter
- ✓ 1090MHz ADS-B out
- ✓ Meets Mandate

As a slide-in replacement for existing KT76A/KT76C/KT78A transponders, the AXP340 is designed to easily upgrade existing Mode A/C equipment to Mode S, while adding additional functionality like a Direct-entry Numeric Keypad, Pressure Altitude & GPS Lat/Lon readout, Flight ID entry, one-touch VFR code entry, an easy-to-use Stop Watch Timer, Flight Timer, and Altitude Alerter.

*Offer only valid
through October, 2014*
